## General Information

### EDITORIAL ENQUIRIES

All enquiries about official notices, public notices, advertisements and general information in the Journal should be directed to IP Australia, ABN No 38 113 072 755, PO Box 200 Woden ACT 2606 (Telephone 02 6283 2999) (Fax 02 6283 7999)

(E-mail [assist@ipaustralia.gov.au](mailto:assist@ipaustralia.gov.au))

Copy for advertisement in the journal should be received at the Patent Office not later than seven days before the desired publication date. If a publication date is not nominated, the advertisement will appear in the next available issue.

### ORDERING PATENT DOCUMENTS

When ordering copies of Australian patent specifications, or abstracts and abridgments notified as open to public inspection on or after 26 October 1978, or as accepted on or after 16 November 1978, the documents should be referred to by application numbers only, preceded by letters AU-A or AU-B respectively.

### REQUESTS FOR INFORMATION UNDER SECTION 194 ( C )

A request for information under Section 194 ( C ) of the Patents Act 1990 should be made in the approved form and be accompanied by the prescribed fee. The request should be as detailed as possible.

### INFORMATION FROM REGISTERS

All requests for information from Register of Patents, Trade Marks or Designs, should be made in writing and accompanied by the prescribed fee. The Registers are located in Canberra and may be examined free of charge.

### COUNTRY CODES

For a listing of country codes used by IP Australia please refer to the Official Journals dated 7 November 1996.

### ABBREVIATIONS IN JOURNAL

Standard abbreviations are used in the name of companies and firms. Enquiries concerning the precise name should be directed to the Customer Support Centre.

### FREEDOM OF INFORMATION ACT

What does it do?

- Gives you right to obtain information held by Commonwealth Ministers, Departments and most statutory bodies (these bodies are called agencies under the Act).
- Requires Commonwealth Government agencies to make available to members of the public:
  - Information about agencies, their functions and operations.
  - Information about rules and practices which are used in making decisions which affect you.

- Gives you a legal right to:
  - See non exempt documents held by agencies, and
  - appeal against a decision not to grant access to a document.

What documents can you see?

- The Act gives you a right to see documents lodged on or after 1 December 1977, or earlier if you need them to understand another document you have already.
- Documents include files, reports, computer printouts, maps, plans, photographs, tape recordings, films or videotapes.
- Documents which are available for purchase under the Patents Act 1990, the Trade Marks Act 1995 or Designs Act 2003 are not available under the Freedom of Information Act (Section 12 refers).

How do you apply?

Requests for access to documents must

- Be in writing
- Provide sufficient information so as to enable identification of the documents requested
- Specify an address in Australia where notices can be sent and
- Be accompanied by the application fee (currently \$30.00) or specify an IP Australia account to which the charges will be posted.

Requests for documents should be addressed to IP Australia, PO Box 200 Woden, ACT 2606, or faxed to 02 6283 7999.

## DECISIONS OF THE COMMISSIONER OF PATENTS AND REGISTRAR OF TRADE MARKS AND DESIGNS

- All decisions of the Commissioner and Registrars are available free of charge from AUSTLII's website [www.austlii.edu.au](http://www.austlii.edu.au)

Copies of all written Patent and Design decisions are available (except if they would not be available under the provisions of the Freedom of Information legislation, e.g. if they would effectively disclose matter from documents that are not open to public inspection) on request for a cost of \$AU 25. They are also available for inspection in indexed volume series, dating from 1 January 1987, in the Office library, Canberra.

Copies of Trade Mark decisions may be accessed via IP Australia's website [www.ipaustralia.gov.au](http://www.ipaustralia.gov.au)

- Copies of the taped record of Patent and Design hearings are available (with the same exception as above) on request.
- When a written decision is issued the fact of the decision plus a brief head note will be published in the Official Notices section of the next available Patents, Trade Marks or Designs Journal.

## HEARINGS BEFORE THE COMMISSIONER OF PATENTS AND THE REGISTRARS OF TRADE MARKS AND DESIGNS

Hearings before the Commissioner of Patents and the Registrars of Trade Marks and Designs will be set down in Melbourne, Sydney, Adelaide, Perth and Brisbane during the periods indicated below.

### Patent Hearings Sessions 2005

|           |                 |
|-----------|-----------------|
| Melbourne | 9 – 11 May      |
| Sydney    | 11 – 13 July    |
| Adelaide  | 2 – 3 August    |
| Perth     | 4 – 5 August    |
| Brisbane  | 1 – 2 September |

Note: Expert matters will have priority over other matters for allocation of a hearing in these sessions.

### Designs and Trade Marks Hearings Sessions 2005

|           |  |
|-----------|--|
| Melbourne | 14 – 18 February<br>6 – 10 June<br>12 – 16 September |
| Sydney    | 14 – 18 March<br>18 – 22 July<br>17 – 21 October     |
| Adelaide  | 15 – 16 August                                       |
| Perth     | 18 – 19 August                                       |
| Brisbane  | 22 – 23 August                                       |

Persons who desire matters to be set down for hearing in Melbourne, Sydney, Adelaide, Perth or Brisbane must give at least one month's notice of their intention to be heard. If such notice is not given, it may be that there would be insufficient time to allow for the execution of official procedures associated with the listing of hearings, and as a result, the matter involved might not be listed.

Subject to the convenience of this Office, hearings will be set down in Canberra at any time suitable to the parties.

## GUIDE TO THE USE OF THIS JOURNAL

The Australian Official Journal of Patents (**AOJP**) reports on all the major events and actions which take place during the life cycle of an Australian patent and provides certain details of these actions as they relate to the patent or patent application involved. This guide sets out to teach the reader how to use the journal to access this information.

While there are many possible actions in the life of a patent, the majority of actions reported relate to the following events, which are the main stages in the progression of a patent application to a sealed patent:

### (i) FILING –

This is the act of making an application. When the application is first filed certain details are published.

### (ii) OPEN-TO-PUBLIC-INSPECTION (OPI) –

Approximately 18 months after first filing of an Australian or a corresponding foreign application, certain application documents, including the complete specification, become available to the public (Open-to-Public-Inspection or “OPI”). Relevant application details are published. In addition, an Abstracts Supplement to the AOJP contains abstracts of the inventive content of the OPI applications.

### (iii) ACCEPTANCE –

This is the Commissioner’s acceptance of a patent application. Once the Commissioner has accepted a patent application, certain details of the application are published in the AOJP. In addition, an Abridgments Supplement contains an abridgment (usually the broadest accepted claim and relevant drawing where appropriate) for each accepted application. Notice of opposition may be filed within three months of advertisement of acceptance.

### (iv) OPPOSITION –

If an opposition action is commenced against the grant of the patent, the six-figure acceptance number and the name of the opponent are published.

### (v) SEALING –

Most accepted applications are not opposed. These proceed to sealing and become granted patents. Of the few that are opposed (less than 1%) most of these, after resolution of the opposition, proceed to sealing and become granted patents. Sealed patents are simply listed in order of their six-figure acceptance number.

In addition to the actions related to these stages, other actions reported include: assignments, lapsing or withdrawal of applications and ceasing or expiry of patents, voluntary amendments, extensions of time for certain actions and registration of licences.

## How To Identify Information Using “INID” Numbers

Patents are published in many different languages. As a result, finding the information that you want (eg the filing date) on a patent document or in a journal can be quite difficult. There is an international system operating, however, which codifies this information in an unambiguous way, by assigning a specific number to each piece of information about the history of a patent. These numbers are called the international agreed Numbers for the identification of Data or INID numbers.

These numbers appear on all published patents and abstracts and are used throughout this journal to identify particular items of information. For example, the data on which a document is filed has the INID number (22), while the name of the applicant has the INID number (71). These numbers are always expressed in parentheses and always immediately precede the information to which they relate. For example:

(22) 12.10.91

means that the filing date of the document which contains this reference is 12 October 1991. Learning the INID numbers for the information you want will help you find it quickly and easily.

A complete list of the INID numbers and the items to which they relate is provided at the end of this Guide.

## How Australia Patent Documents are Numbered

Patent applications in Australia are assigned numbers at various stages in their processing. Each Australian application which proceeds to acceptance will have at least two (and sometimes more) different numbers during its life. When searching for information and ordering documents it is vital that you understand the numbering systems.

### 1. **Provisional Applications** are given a number with two characters and four numbers

e.g. **PM1234**

A provisional application number is identified by the INID number (21).

### 2. **Complete Applications** are given a five-figure application number followed by the last two digits of the year of filing

e.g. **12345/93**

There are prefixes applied to this number which indicate whether the application has been accepted:

A document corresponding to an **unaccepted** application has the prefix, **AU-A**; e.g. AU-A-12345/93.

A document corresponding to an **accepted** application carries the prefix **AU-B**; e.g. AU-B-12345/93.

Users need to be aware that an accepted document may differ from the corresponding unaccepted document. This is because **amendment** may occur between first publication (OPI) and second publication (acceptance).

A five-figure application number is identified by the INID numbers (11) or (21).

3. When a patent application is **accepted** it is given a six-figure document number in addition to the five-figure application number  
**e.g. 123456**

This is the number you must use to keep track of the application in the AOJP from now on. It is identified by the INID number (10).

NOTE: When ordering any patent document from us, whether accepted or not, please quote the five-figure application number preceded by the appropriate prefix.

## Arrangement of Information in the Journal

For each of the categories

- (i) Provisional Applications Filed,
- (ii) Complete Applications Filed
- (iii) Applications Open to Public Inspection, and
- (iv) Applications Accepted

The Journal lists the information published in that category in an alphabetical **Name Index** list based on the name of the applicant. These indices are useful if you wish to find information about applications made by a particular applicant.

In addition to the Name Index there is provided, for each of these categories, a **Numerical Index**. This index lists the applications either in order of their five-figure Application Numbers, in the case of complete applications filed and applications OPI, or in order of their six-figure Document Number in the case of accepted applications. It provides, for each number, the name of the applicant. These indices are useful if you wish to track the progress of a particular patent application.

There are also **IPC indices** provided for applications which are OPI and for applications which have been accepted. IPC stands for International Patent Classification. Each IPC "mark" is an alpha-numerical representation of a particular area of technology. These indices are in order of IPC mark, and within each mark provide either the five-figure application numbers of the applications which are now OPI or the six-figure numbers of the cases now accepted. These indices are useful if you wish to check on patent activity in a particular technology.

## Using the Indices

### 1. To Find Patent Information If You Know the Name of the Applicant.

Use the Name Indices. They will give you the following information identified by their INID number:

| <u>ITEM</u>   | <u>INID No.</u> | <u>ITEM</u>  | <u>INID No.</u> |
|---|-----------------|--|-----------------|
| <b>A) Provisional applications filed – Name Index</b>         |                 | <b>B) Complete applications filed – Name Index</b> |                 |
| The <u>name</u> of the applicant                              | (71)            | The <u>name</u> of the applicant                   | (71)            |
| The <u>Provisional application number</u>                     | (21)            | The <u>number</u> assigned to the application      | (21)            |
| The <u>date</u> of filing                                     | (22)            | The <u>date</u> of filing                          | (22)            |
| The <u>title</u> of the invention                             | (54)            | <u>Title</u> of the invention                      | (54)            |
|   |                 | <u>Number</u> of priority document(s) if any       | (31)            |
|   |                 | <u>Date(s)</u> of filing of priority documents     | (32)            |
|   |                 | <u>Country</u> in which priority document filed    | (33)            |
|   |                 | PCT application <u>number</u>                      | (86)            |
| <u>ITEM</u>   | <u>INID No.</u> | <u>ITEM</u>  | <u>INID No.</u> |
| <b>C) Applications open to public inspection – Name Index</b> |                 | <b>D) Applications accepted – Name Index</b>       |                 |
| The <u>name</u> of the applicant                              | (71)            | The <u>name</u> of the applicant                   | (71)            |
| The <u>number</u> of the document                             | (11)            | The <u>number</u> of the document                  | (11)            |
| The <u>number</u> assigned to the application                 | (21)            | The <u>number</u> of the accepted document         | (10)            |
| The <u>date</u> of filing                                     | (22)            | The <u>number</u> assigned to the application      | (21)            |
| The <u>title</u>  | (54)            | The <u>date</u> of filing                          | (22)            |
| The <u>classification marks</u>                               | (51)            | The <u>title</u>                                   | (54)            |

|   |      |   |      |
|---|------|---|------|
| Priority document <u>number(s)</u>              | (31) | The <u>classification marks</u>                 | (51) |
| <u>Date</u> of filing of priority document(s)   | (32) | PCT publication <u>number</u>                   | (87) |
| <u>Country</u> in which priority document filed | (33) | Priority document <u>number(s)</u>              | (31) |
| Publication <u>date</u> of unexamined document  | (43) | <u>Date</u> of filing of priority document(s)   | (32) |
| Inventors <u>names</u> if known                 | (72) | <u>Country</u> in which priority document filed | (33) |
| <u>Patent Attorneys</u>                         | (74) | Publication <u>date</u> of unexamined document  | (43) |
| Related by addition                             | (61) | Publication <u>date</u> of examined document    | (44) |
| Related by division                             | (62) | Publication <u>date</u> of granted document     | (45) |
|   |      | Inventors <u>names</u> if known                 | (72) |
|   |      | <u>Patent Attorneys</u>                         | (74) |
|   |      | Related by addition                             | (61) |
|   |      | Related by division                             | (62) |

You will notice at each stage of following an application through that all applications are in alphabetical order of Applicant, not inventor.

## 2. To Find Information About a Patent Application If You Know Its Number.

Use the appropriate numerical index. This will give you the name of the applicant from the number. You will then need to use the appropriate Name Index as above to find out other information about the Patent Application you are interested in.

The following Numerical Indices are available:

- A) **Provisional** Applications filed.
- B) **Complete** Applications filed.
- C) Applications **Open to Public Inspection**.
- D) Applications **Accepted** (note that this uses six-figure document numbers rather than five-figure application numbers).

## 3. To Find Information About Patent Documents in the Area of Technology in which You are Interested if You Know the International Patent Classification Mark for that Area.

All patent applications are classified according to their subject matter using the International Patent Classification ( **IPC** ). Although the system is very detailed and covers all technologies, knowledge of the IPC marks of the technologies you are interested in will allow you to find patent documents in these technologies quite easily. To identify the IPC marks of technologies you are interested in, you can inspect relevant documentation in any of IP Australia's state offices.

The indices to use are

- A) Applications **OPI** – IPC Index
- B) Applications **Accepted** – IPC Index.

These indices give you the numbers of the applications which are either OPI or Accepted and are listed in order of their IPC marks.

Once you have the numbers of the documents that interest you, consult the relevant Number Index (see 2. above) to find the applicant's name, and then the Name Index (see 1. above) to find out the details of that application.

## INID NUMBERS in use on Australian Patent Documents

INID is an acronym for 'Internationally agreed Numbers for the Identification of Data'.

### (10) Document Identification

- (11) Number of the document
- (12) Plain language designation of the kind of document.
- (19) WIPO country code, or other identification, of the country publishing the document.

### (20) Document filing data

- (21) The number(s) assigned to the application(s)
- (22) Date(s) of filing application(s)
- (23) Other date(s) of filing, including exhibition filing date of filing complete specification following provisional specification.
- (24) Date from which industrial property rights may have effect.

### (30) Priority date

- (31) Number(s) assigned to priority application(s)
- (32) Date(s) of filing priority application(s)
- (33) Country (countries) in which the priority application(s) was (were) filed.

### (40) Date(s) of making available to the public

- (43) Date of publication by printing or similar process of an unexamined document, on which no grant has taken place on or before the said date.
- (44) Date of publication by printing or similar process of an examined document, on which no grant has taken place on or before the said date.
- (45) Date of publication by printing or similar process of a document, on which grant has taken place on or before the said date.

### (50) Technical Information

- (51) International Patent Classification.
- (52) Domestic or national classification.
- (54) Title of invention.
- (56) List of prior art documents, if separate from descriptive text.
- (57) Abstract or claim.

### (60) Reference(s) to other legally related domestic document(s)

- (60) Related by cognate(s).
- (61) Related by addition(s)
- (62) Related by division(s).

### (70) Identification of parties concerned with document

- (70) Name(s) of nominated person
- (71) Name(s) of applicant(s).
- (72) Name(s) of inventor(s) if known to be such.
- (74) Name(s) of attorney(s) or agent(s).
- (75) Name(s) of inventor(s) who is (are) also applicant(s)

### (80) Identification of data related to International Conventions other than the Paris Convention

- (86) PCT Application Number.
- (87) PCT Publication Number.

#### NOTE:

(1) Australian patent documents published on or after 26 October 1978 should be referred to by the application number preceded by the AU-A or AU-B.

**AU-A** = Pre-examination

**AU-B** = Post-examination

(2) The classification used is the International Patent Classification and is identified by the INID code (51). Further editions of the classification are identified as (51)<sup>2</sup>, (51)<sup>3</sup>, (51)<sup>4</sup> and (51)<sup>5</sup>.

(3) INID code 74 provides for the name of patent attorney, or firm of attorneys, prosecuting an application.

(4) No provision is made for addresses for service. Addresses for service of applicants not represented by an independent attorney or firm are viewable at [www.ipaustralia.gov.au](http://www.ipaustralia.gov.au) and on sale at the IP Australia State Offices.

Official Notice

**Patents: Amendment of the Manual of Practice and Procedure (National)**

In May 2005 amendments were made to the Manual of Practice and Procedure Volume 2 - National.

The principal change relates to:

- Updating Part 25 to better explain the issues relating to employees' involvement with inventions, and providing better guidance to patent examiners as to what level of assistance they can provide applicants with during examination without infringing upon section 196 (Part 25).

## ABSTRACTS OF DECISIONS

## DECISION OF A DEPUTY COMMISSIONER OF PATENTS

|                    |   |  |
|--------------------|---|--|
| <b>Application</b> | : | Innovation Patent No. <b>2004100848</b> in the name of <b>Peter Szabo and Associates Pty Ltd</b> |
| <b>Title</b>       | : | <b>Home Equity Release Plan</b>  |
| <b>Action</b>      | : | Examiner's objections in certification.  |
| <b>Decision</b>    | : | Issued <b>5 May 2005</b>   |

**Abstract**

The invention relates to a 'reverse mortgage', where (typically) an aged person part-sells an interest in their home in return for a cash deposit, with settlement occurring after death. In the usual reverse mortgage arrangement, the financier may make an excessive profit in the event of early death. The invention ameliorates this by providing for a rebate in these circumstances, and provides some mathematical expressions for determining the amount of the rebate. The examiner objected that the invention was not for a manner of manufacture. There was no objection to lack of novelty, or lack of innovative step

- For determining whether an invention is a manner of manufacture, the right question is: "Is this a proper subject of letters patent according to the principles which have been developed for the application of s.6 of the *Statute of Monopolies*?"
- The purpose of s.6 of the statute of Monopolies was to encourage development in the fields of science and technology. To be a manner of manufacture an invention must contain some material element that relates to science or technology. This might occur as a result of the application of a discovery of a law of nature, or a principle of science. It might be by way of creation of a new device, chemical entity, electromagnetic field or other entity, or related processes. Or it might make use of some device or entity for some purpose. Failing this, such an invention cannot be the proper subject of letters patent according to the principles which have been developed for the application of s.6 of the *Statute of Monopolies*.
- The distinction between the fine arts and the useful arts as discussed in the *NRDC* and *Virginia-Carolina* decisions is whether or not the invention involves the application or use of science and/or technology in a material manner.
- Mathematical expressions or algorithms may represent properties of the universe in which we live, properties of the number system, or agreed arrangements between people. The important issue is not the presence of an algorithm or formula *per se*. Rather it is – what does the formula represent?

continued next page

- It may be conceded that the alleged invention addresses a practical need in the affairs of people – and indeed creates a more equitable outcome compared to the prior art. It may also be conceded that the alleged invention meets the criteria of novelty and innovative step. But this is not enough. The criterion that an invention must be for a manner of manufacture is a real criterion additional to that of novelty and innovative step. The invention must be for “a proper subject of letters patent according to the principles which have been developed for the application of s.6 of the *Statute of Monopolies*”. This requires at least some material application of science or technology.
- The claimed invention does not embody in any material manner elements of science or technology. The claimed invention is no more than a prescription of the basis of a contractual agreement between parties, based on mathematical expressions formulated to produce a more equitable arrangement.
- Innovation Patent revoked

| <b>Application</b> | : | No. <b>2002951831</b> in the name of <b>JOHN EDWARD VINES</b>   |
| <b>Title</b>       | : | Underpants for the Treatment of Pelvic Floor Muscles and/or Bladder.  |
| <b>Action</b>      | : | Request under Section 36(1) of the Patents Act by <b>JOHN MCDONALD</b> for a declaration regarding entitlement to an invention disclosed. |
| <b>Decision</b>    | : | Issued 30 November 2004.  |

**Abstract**

The subject matter broadly related to underpants which either electrically or magnetically stimulated various areas of the body to treat incontinence.

An invention allegedly obtained related to replacing the electrical stimulation electrodes with magnets.

[PASSAGE NOT PUBLISHED BY REASON OF CONFIDENTIALITY]

Of the evidence provided by Vines on his research into magnetic therapy (which was mostly in the form of print outs of Internet pages), one document did not appear genuine. Furthermore, Vines was asserting that other Internet pages were the same as those he viewed in his period of research from 1999 to May 2002, even though they were printed well after. However, it is well known that Internet pages may be changed, and there may be little correlation between a page a viewed today and a page as it existed several years ago. Hence, Vines' evidence was given little weight. Nevertheless, from further evidence given by Peter O'Neill, the balance of probabilities was that McDonald did not suggest replacing electrodes with magnets.

[PASSAGE NOT PUBLISHED BY REASON OF CONFIDENTIALITY]

McDonald was not successful. Thus costs were awarded against McDonald.
